**July 18, 2005**

### **TILSON HAS HOME EVALUATED BY REEP AND REDUCE THE JUICE TEAM**

**ORANGEVILLE** – David Tilson, MP for Dufferin-Caledon opened his home to be evaluated by the Dufferin-Caledon Residential Energy Efficiency Project (REEP), a federal government's EnerGuide for Homes program. This is a joint initiative between the Elora Centre for Environmental Excellence and the Caledon Countryside Alliance both not-for-profit organizations that deliver environmental programs to their local communities.

In addition he took part in a survey conducted by Reduce the Juice. Four students and two team leaders from Shelburne are a part of the Reduce the Juice program supported by two federal funding agencies, EcoAction and Human Resources & Skills Development Canada. These students observed the evaluation being conducted by Mr. Peter Livingston of REEP and will be making recommendations for Mr. Tilson to reduce energy consumption.

“I was very impressed by both REEP and the students with the Reduce the Juice Program. Conserving energy has become an increasing concern to all and we should all take steps to reduce the amount of energy we consume. These students have given their time to this program and I give them a lot of credit for their initiatives thus far to reduce Shelburne's energy use by 5%,” Tilson said.

“I also look forward to the results of my evaluation and the recommendations that will be made by Mr. Livingston as to how I can better conserve energy in my own home,” Tilson stated.
