

Your green living 'one-stop-shop'

Green Pathways opens for business, shows you how to go "green"

Green Pathways Inc. (a co-venture of Orangeville Hydro Limited and Power Up Renewable Energy Co-operative Inc.) will hold the grand opening of its new store on Saturday, May 31st, as a fitting conclusion to Energy Conservation Week in Orangeville.

Green Pathways is an energy conservation, energy efficiency, and green living one-stop-shop to service both residential and commercial clients. The service, being provided from the Orangeville Hydro office at 400 C Line, is the initiative of a dedicated team with the ongoing support of Orangeville Hydro Limited president George Dick and the Boards of Orangeville Hydro Limited and Power Up Renewable Energy Co-operative Inc.

The Green Pathways business format was developed during the winter of 2007/2008. Whether you are a homeowner or a business, Green Pathways will be the place to visit to learn what you can do to combat climate change, reduce your carbon and eco-footprint, conserve energy and other resources e.g. use energy and other resources more efficiently and effectively, generate green power and 'live green'.

Green Pathways is there to link people and businesses with products and services -- there is no other local business like it. The Affiliate Program supports this, through affiliations with various manufacturers, suppliers, and service providers. Green Pathways offers the connection, the services and the products to explain and teach you to become more "green" and be able to put what you've learned into practice.

The grand opening display, on May 31, will include products and services offered by Green Pathways. So come out and spend some time with the people who want to help you go green. You will learn that it all starts with a Green Pathways Energy Consumption Evaluation and from there you are able to select the Pathway that is right for you.

Come and meet the Green Pathways Board of Directors Jan Howard, Hiedi Murray and Terry Williams, along with the General Manager Tony Howard and office assistant Amy Proctor-Long. Chris de Castro will also be on hand to talk to you about energy conservation, energy evaluations and audits, green construction and lighting. Michelle Freundt, who has her own green cleaning business, will also be in attendance to share her expertise. A total of at least 15 businesses will be present at the grand opening.

The grand opening runs from 10 a.m. to 3 p.m. on May 31, with the official opening slated for 11 a.m.
